Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 6, 10-24, 28-31, 34-41 and 44-48 are rejected under 35 U.S.C. 102(b) as being anticipated by Foos (5,788,105). Foos discloses, in figs. 1 and 2, a thermoformed plastic container comprising a base 14 having a tamper evident lock base portion 94 connected to the base by a fracture portion; a cover 12 having a tamper evident lock cover portion 84 connected to the cover by a fracture portion; a material of the lock cover portion and a material of the lock cover portion adhere when pressed together (see fig. 2); the base including a base sealing thread 70 having a forward limit wall 72, and the cover including a cover sealing thread 28 having a forward limit wall 36.

3. Claims 21-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Meek (4,953,728) or Van Halteren (5,628,417).

Meek discloses, in fig. 1, or Van Halteren discloses, in fig. 1, a thermoformed plastic container having a base sealing thread and a cover sealing thread substantially as claimed.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4, 5, 7-9, 32, 33, 42 and 43 rejected under 35 U.S.C. 103(a) as being unpatentable over Foos in view of Aylward (6,625,955).

Foos does not disclose the material of the lock cover portion and the material of the lock cover portion are adhered by adhesive, heat, radio-frequency energy, and microwave energy.

Aylward teaches, in col. 7, lines 39-45 and lines 51-54, locking portions are adhered by heating process or adhesive seal.

Heating process by radio-frequency energy and microwave energy is well known in the art.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to make the locking portions of the Foos invention are adhered by the process as claimed in order to enhance the locking between the locking portions.
